Inter EURLs Working Group on NGS (NEXT GENERATION SEQUENCING)

Foreword

The inter EURLs Working Group (WG) has been established by the European Commission with the aim to promote the use of NGS across the EURLs' networks, build NGS capacity within the EU and ensure liaison with the work of the EURLs and the work of EFSA and ECDC on the NGS mandate sent by the Commission. The WG includes all the EURLs operating in the field of the microbiological contamination of food and feed.

Training course objectives:

- Providing an overview of different possible approaches for NGS data analysis.
- Illustrating the basic steps for data analysis (quality check, trimming, assembly, search of genetic features of interest).
- Providing guidelines for cluster analysis.
- Illustrating guidance documents on NGS analysis published by the Inter EURLs Working Group.
- Exchanging experiences among participants and reinforcing networking.

After the course, the participants will be able to:

- Choose a solution for NGS data analysis.
- Understand the vocabulary connected to NGS data analysis.
- Perform basic analysis on NGS data (quality check, trimming, assembly, search of genetic features of interest).
- Evaluate and interpret the results obtained.
- Understand the concepts behind different cluster analysis approaches.
