

# Interlaboratory proficiency test Biological control

EU Reference Laboratory for Brucellosis  
ANSES – Maisons-Alfort, France

- Included in EURL 2014 Work programme
- The scope : **official batch to batch control of Rose-Bengale diagnostic antigens**
- The objective : to evaluate the performance of such controls in the EU and their conformity to the Annex C of EC 64/432 directive requirements.
  
- To be organized during last trimester 2014 (November)
- Open to MS
- Participation survey will be distributed during this workshop

- Participants will be provided with :
  - 3-4 Samples of  $\neq$  Rose-Bengale antigens meeting or not EU requirements
  - A vial of French national standard (used as a reference)
- Need of national standard equivalent to OIEISS
  - Do you have such a national standard?
- Evaluation will focus on : sensitivity against OIEISS  
(+) at 1/45 & (- )at 1/55
- Specifications on the protocol (volumes, ...)

*Please answer the survey for participation! Thanks!*
