

FRENCH NATIONAL AGENCY for SAFETY
of FOOD, ENVIRONMENT and OCCUPATIONAL HEALTH

EUROPEAN UNION REFERENCE LABORATORY
for Antimicrobials (A6 & B1), Carbadox & Olaquinox (B2f)
and Dyes (B3e) Residues in Food

PLEASE NOTE

On your agenda the main activities proposed to the NRLs network
by the EU-RL ANSES-Fougeres

For the year 2015

ANALYTICAL METHODS:

Evaluation of new technologies for rapid screening of antimicrobial residues in Foodstuffs by biosensors (Follow-up)

Evaluation of new rapid biomethods and kits for screening antimicrobials in eggs

Converging toward a Multi-Matrix /Multi-Antimicrobial Residues Method in Food Products by Using suitable LR/HR LC-MS (Follow-up)

Metabolomic approaches for the search of biomarkers of illegal treatments with C3G-C4G in poultry and eggs by LC-MS/MS and LC-HRMS

Enhancing the control for multi-Dye residues in aquaculture products by LC-MS/MS and LC-HRMS

WORKSHOP:

Microbiological screening of antimicrobials – Survey of Methods & Guidelines for Validation
([7-9 or 14-16 October](#))

PROFICIENCY TESTS:

Confirmation of Nitrofurans Residues in Naturally Incurred Meat ([February-March](#))

Screening and Confirmation of Antimicrobial Residues in Meat ([October-November](#))
